

PRODUCT FEATURES

"PLUS" ANATOMICAL MOUTHPIECE

for use during pulmonary lung function testing (adults, children)

Description: Soft anatomical mouthpiece allows adequate blockage of mouth while avoiding possible leaks and dispersion from the sides of the mouth itself.

Unique features: Small-sized mouthpiece with internal lip to compensate the filter edge and thus avoid air backflow during pulmonary function test.
Placed between teeth or between teeth and lips; there is no need for the usual extensions to bite down on.
The mouthpiece has been designed to conform to the dental arch.
