

## PRODUCT FEATURES

## SPIROMETRY FILTER TUBE "KIT" (white-orange)

For use during pulmonary lung function testing **Spirometers: CareFusion - Jaeger** 

Description: Filter: barrier filtration for protection of patient, staff and equipment from bacterial and viral

contamination.

Filter + Nose clip "FOAM"

Code items:

- individually packaged: 30909 Adult / Paediatric (30811 + 30851)

Materials:

Flow resistance:

(connector not included)

Quantity / box:

housing: Polystyrene (HIPS) <u>recyclable</u>
 filter media: Hydrophobic Polypropylene (TECHN)

- nose clip: PolyAcetato (POM) - Durecon M270

- sealed: Ultrasonically

Kind of filtration: Electrostatic / Mechanical

- Flow rate 12,00 L/sec < 0,93 cm  $H_2O$  / (L/s)

Bacterial Filtration Efficiency: 99,9 %
Viral Filtration Efficiency: 99,9 %

(complies with ATS)

Dead space of the filter: 32,00 ml

Filtration area: 11,46 cm<sup>2</sup>

Exchange filtration area: > 34,00 cm<sup>2</sup>

Weight of the filter: 18,00 g

Working procedure: Class Ila - Eurofins

Disposable

NOTES: single patient use. Latex free. Medical Devices Regulations - Directive 93/42/EEC

Any size of adaptors is available upon request.

TEST: NELSON Laboratories - USA -
